

Energy Nozzle

Product Introduction

The energy nozzle is a pressure atomizing nozzle that can adjust the spray flow and angle. There are oil returning channels and thimble inside. When the oil return valve is opened, the area of oil returning channel can be changed by the thimble to control the oil returning volume and angle.

Characteristics

1. By changing the area of the return oil channel to control the volume of returning oil, so as to adjust the capacity of injection
2. Capacity: 600-2400kg/h
3. Spray angle: 45°
